We provide brushes and pad holders that will give you the best possible performance between machine and floor. Following are descriptions of the materials and their applications when used on the CR .

- SuperGrit:** The most aggressive grit filament available. Used primarily on concrete floors in factories to remove heavy built up soil-age. The color of the filament is orange with bristle diameter of .070 and grit size of 46.
- Clean Grit:** The most widely used grit filament. Ideal for concrete or sealed concrete surfaces. The color of the filament is blue with a bristle diameter of .050 and a grit size of 80.
- Soft and Black Nylon:** Resistant to many chemicals. Do not use with acids. Soft nylon is used for light cleaning and Black nylon is used where a more aggressive brush is required combined with a long life. Soft nylon is white and blacknylon is black.
- Polypropylene:** Used for general purpose scrubbing of most hard surfaces. Commonly offered in .040" diameter bristles. Color is black.
- Straight Wire:** Used when scrubbing floors with impacted build up. A grit brush may be a better alternative.
